On-Demand Video News Feed

On-demand video news feed based on personalization of your interests so you're not subject to what all the media outlets currently force.

Contents

Description

Time is precious, Media is "Fake", social media is driving public opinion, how do you find creditable news video sources that peak your interests. What if there was a service where you can specify interests and videos could be provided to you in a specified time frame. So let's say you have 30 minutes in the morning where your option is to tune into the television and be fed information by 5 major news source: CBS, Disney, NBC, TimeWarner and Viacom. Now with On-Demand Video News Feed where you can chose your video sources that can create a 30 min segment based on your interests from any sources to get an objective view of your world.

Problem

There are no easy ways to "traditionally" watch your video programming that can get you started on your day. There are 5 major companies on television that provide you with the content you are looking for in a short period of time. People want objective news videos that tell them what's going on in their world but there are currently no easy ways to obtain this information in a timely manner.
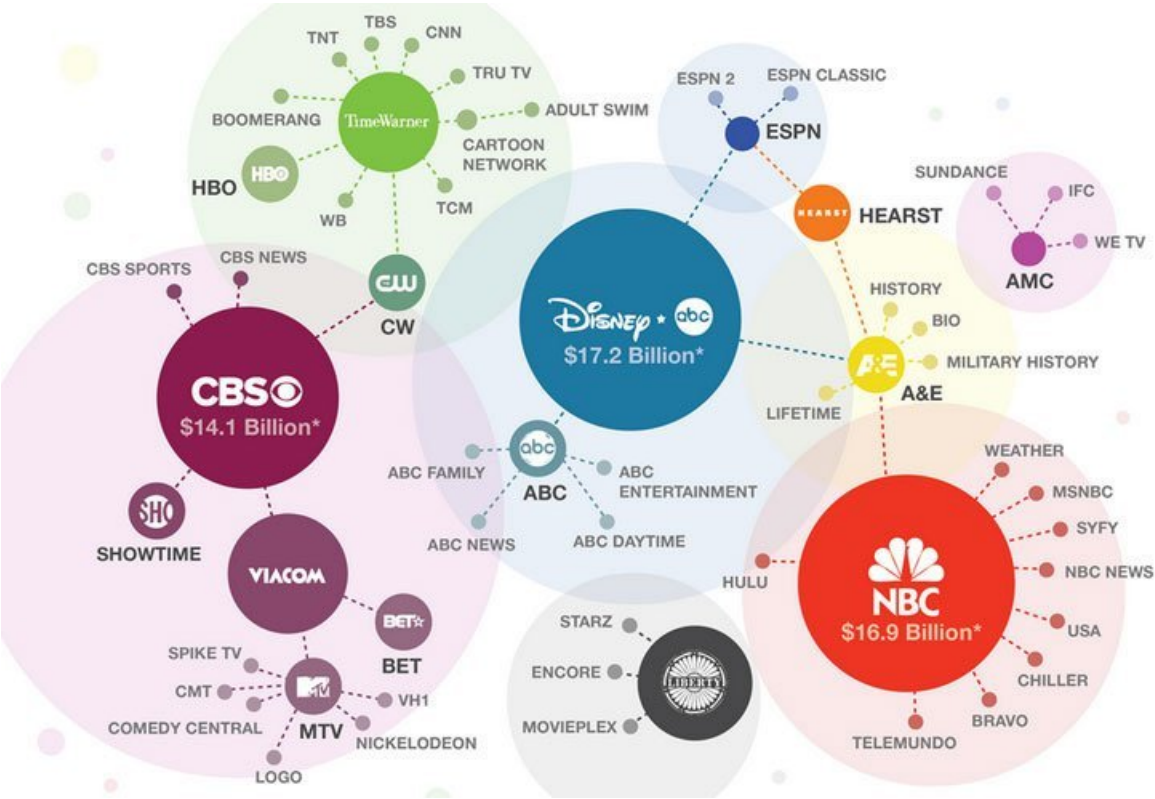

Solution

On-Demand Video News feed provides your with the objective information you are looking for in your news. It aggregates your news feeds based on your preferences and provides you a snapshot of what's going on in the world above what the big 5 major companies are willing to share.
